

Instructions for Visitors

How to Set Up an Account on cuScreen:

If you do not have a MyCarletonOne (MC1) account, you will need to create a new account on [cuScreen](#) in order to complete the mandatory COVID-19 Screening Self-Assessment.

Please note that a COVID-19 Screening Self-Assessment **must be completed daily before coming to campus.**

This can be done through the following steps:

1. Visit carleton.ca/covid19/cuscreen.
2. Under **Visitors (No MC1)**, click **Create New Account** if you have not previously created an account, where you will be led to a new page from Thrive Health, Inc.
3. Click the **Sign Up** option at the bottom of the **Login to your account** section.
4. You can now create your account by entering your preferred email and setting up your password.
5. Select your language and verify your new account by accessing the verification email within the email account you have provided.
6. Once you verify your account, you will be prompted to sign into your account using the email address and password you have provided.
7. Click **Confirm** under the **Enter registration code** prompt. The registration code is **CARLETONU-VISITOR**.
8. Click on **My profile** and click **Confirm** after reading the consent information.
9. Fill out the new profile form as necessary. Note that the required fields are your first and last name.
10. Click **Finish Registration**. At this point you can also create another user profile if necessary. Please ensure you only create one account per individual in cuScreen.

Please reach out to covidinfo@carleton.ca if you are experiencing problems setting up your account. Please also refer to the [cuScreen FAQ](#).
